

## **PASSWORD USE**

### **TASK 1- For both Mac and iPad Users**

Take time to check through your passwords and sign-ins **that are not related to money** and consider using **THE SAME PASSWORD for each account**. This will reduce the problems with managing multiple accounts.

#### **When selecting a Password a Handy Hint is to**

- Select a phrase or song line you will remember e.g.  
**I Think, Therefore I Am**
  - Write down the first letter from each word: **ittia**
  - Change some of the letters to numbers or symbols: **1tt1@**
  - Change and save old passwords
- 

### **TASK 2**

p

#### **INVESTIGATING PASSWORD MANAGERS FOR IPADS & MACS**

- Go to the app store
- In the search field type passwords
- Press search
- A number of apps that are related to passwords will appear.
- Click on the icon to read more about the app - what it does, screen shots, etc
- Click on the reviews tab and read the reviews
- Select the app that best suits your needs and download it. You might need to try a few before you are happy. You can delete the unwanted ones later.
- Follow the instructions and add your passwords
- Report back to class next week with your recommendations for a password management app.
